

Edmondson Park Development

Sydney, New South Wales
Dahua Group

A fully integrated open space network providing the community with an enticing array of recreational activities and open space parklands.

The Edmondson Park development commenced in February 2016, with the project requiring full landscaping for stages 1-3 and the redesign of the sales centre in line with the delivery of a comprehensive landscape master plan and subsequent staged DA submissions.

Place Design Group were engaged by Dahua Group (under project management of APP) to undertake the full landscape services to all stages of this development as well as the redesign of the sales centre. Place Design Group were also involved in construction review and handover to Council for stage 1 and delivered high quality outputs for stage 2 and 3 CC documentation for submission

Working collaboratively with Campbelltown Council, Place Design Group implemented several progressive landscape initiatives, significantly raising the standard of public open space across the development.
