creating great places

If you are passionate about IT, CAD/BIM design and data innovation, quality design and outcomes, and thrive in a dynamic team environment ... this is the role for you!

Watch a snapshot of who we are - <https://youtu.be/hwYGFzZK-c0>

This is a role for an experienced Solution Architect (landscape architecture or architecture/urban design experience required) to join an established multidisciplinary team of urban designers, landscape architects, planners and economists.

We are proud of our reputation as collaborators, delivering leading and high-quality professional services for our networks of clients. For prospective candidates, we are looking for an individual that wants to improve efficiencies, enable quality outputs, and encourage innovative thinking in the systems and programs we use.

Whilst we are looking for a team member who will be responsible for systems improvement and advancement across our IT platforms, we are also looking for an individual with a technical background in design that can also participate within projects to deliver work across either landscape architecture or urban design. As such you will have the skills across:

- Undertake system problem diagnosis, analysis and enhancement
- Working with our design and planning teams to enhance existing systems and templates or look to implement new systems and programs (software platforms such as AutoCAD, Revit, Rhino3D, Grasshopper, Sketchup, Photoshop, Illustrator, GIS)
- Coordinate training and change communication for system improvements
- Preparation of design drawings, and construction documentation (preferred, not essential)
- Project contract administration (preferred, not essential)
- Coordination with external IT providers to provide both hardware and software implementations across our Australian offices.
- Provide advice to clients, both internal and external
- Preparation of tenders, proposals, and submissions (preferred, not essential)

ESSENTIAL EXPERIENCE / ATTRIBUTES:

- Tertiary qualification in landscape architecture, architecture, engineering or similar

- Min. 5 year's industry experience working across IT and design
- Expertise in CAD and BIM, Adobe Creative Suite and 3d Modelling software
- Significant project management experience
- Experience in agile and structured environments
- Outstanding ability to analyse, isolate and interpret business needs and develop appropriate technical solutions
- High level written and verbal communication skills
- Australian resident (preferred, not essential)

HOW TO APPLY

If you feel you are the right person for this opportunity, we would love to hear from you.

Please send a cover letter, resume, and portfolio OR link to your online portfolio to careers@placedesigngroup.com.
